Overview

What is HTML?

- HTML (HyperText Markup Language) is the standard language used to structure and display content on the web. It organizes text, images, links, and other elements to create web pages.

Examples of JAMstack:

- [Google Homepage](#): Simple, HTML-structured layout that loads quickly.
- [BBC News](#): HTML structures news articles, making them accessible and readable on different devices.

- .html Extension: Save your HTML files with the .html extension to ensure they are recognized as HTML documents by browsers.

Basic Editors
